# Framer Designer

**Location:** Onsite - Bengaluru

**Apply Here:** <https://forms.gle/iv2DpubVfT2jYRsz7>

---

## About Fibr AI

Fibr AI is an all-in-one AI platform that helps businesses improve conversions with CRO Agents (Conversion Rate Optimization). Fibr increases this through AI-driven hypothesis generation, personalization, A/B testing & web monitoring.

---

## Role Overview

We're hiring a **Framer Designer** to design, prototype, and build high-converting web pages and custom interfaces for Fibr AI. You'll collaborate with product, marketing, and engineering teams to create user-centric designs.

---

## What You'll Do

- **Design & Prototyping:**
  - Build responsive, interactive web pages (landing pages, product demos, dashboards) using **Framer**.
- **Collaboration:**

- Partner-up with the product & marketing team to create new pages and upgrade out existing website.
- 

## Expectations Over Time

- **Week 1:** Understand Fibr AI's product, design, and workflows.
  - **Month 1:** Own end-to-end design for 1-2 live projects (e.g., landing page revamp).
  - **Month 3:** Deliver measurable improvements in Homepage, Product & Solution pages.
- 

## You Should Have

- 1–3 years of experience designing websites, landing pages, or SaaS interfaces.
- **Expertise in Framer** + Figma/Sketch/Adobe XD.
- Strong portfolio showcasing **responsive designs, interactions, and prototyping**.
- Ability to collaborate with non-design stakeholders (marketing, sales, engineers).
- Startup/high-growth experience preferred.
